This is the appointed time. Ten years hence it will be too late. The game will be made. It is easy to say that American genius and enterprise will conquer the markets of the world, but Spain kept our products out of Cuba for a century by hostile tariffs, and this exclusion had quite as much to do with bringing on the war as sympathy for the vicitims of Spanish tyranny Governor Morton of Indiana, when sarcastically upbraided by his enemies for inconsistency, was accustomed to retort that there were but two classes of citizens who never changed their opinions— those in idiot asylums and those in the cemeteries. This was not perhaps philosophic, but it had kernel of truth. It is possible for a political leader, in the conctantly changing condition of a nation's daily life, to maintain absolutely immutable opinions upon all subjects affecting the public welfare. From St. Mary's he went to Tipton, Mo., to speak for Judge Shackelford, whom the Democrats nominated for con-

gress as the successor for Bland. He made the same speech on both occasions, and, returning from Tipton, was interviewed at Kansas City, Where he relterated his devotion to free silver and the Chicago platform, with hostility to imperialism, militarism and trusts added thereto. The audience at Tipton grew retive at hundreds silently tole away. In response to the demand of an impatient hearer to give them something on imperialism. Mr. Bryan said: "We drove the Spaniards from Cubz and then told the Cubans they were free to govern themselves. We have driven the Spaniards from the Philippines, and why not tell the Filipinos they are

free to govern themselves?" Quite so. So say we all; but suppose, after we drove Spain from Cubs, an army of insurgents and malcontents, under the lead of an ambitious and unscrupulous outlaw had attacked our rtoops, defled the flags, burned towns, levied contributions, kept up guerilla warfare, fired on hospitals and flags of truce and refused all overtures for peace, what then about

What would have bee nihe werdict of the American people upon the gian or the party that, under such conditions, advocated hauling down the flag, the retreat of our armies ,the surrender of Havana and Santiago, the evacuation of the isundisputed supremacy of the most degraded and malignant elements of its population? Freedom shricked when we annexed the Sandwich islands, but that wild cry of alarm has died away. We will take Cuba, by a common law marriage, if not by more intimate relation, and we are fighting in the Philippines, as everybody but Mr. Bryan knows, not for glory or empire, but for justice and patriotism, our country and its destiny. When McKinley said where the flag was raised it would float in peace and triumph and honor, he hit the bull's eye and rang the bell. This closed the debate. Mr. Bryan has distinctly lost ground in this part of the world in the past year. Public interest in him has @minished. He does not draw well. Intellectually he has retrograded. The treas day the shipbuilding firm of Lally & Co., of Beston, asked for a year's extension suits obtained for the benefit of thep boats De Long and Blakely, now under construction in their yards. The Nixons, at Elizabethport, N. J., who are building the torpedo boats Nicholson and O'Brien, have stated-to naval officials that it is impossible for them to get forgings an struts and it is expected that they will have to ask for an extension. There are twelve of the torpedo boats and destroyers under construction in various yards and all are affected by the "steel famine" and the heavy prices, so that it is ex pected that extensions will be asked or all these craft. The prospect is that the bids on the six protected cruisers, to be opened on November 1, will be much higher than was expected when the proposition for them was made. It is estimated that the steel in bulls has advanced about 50 per cent; in engines 40 per cent; in boilers 30 per cent and that the aver-

ships is about 25 per cent. The engineering bureau has also felt the advance, not only in increased prices, but in an inability to get material and buildings inside the limit fixed by congress.
